Usability and Interface Design

Testing usability of Tuubi

30.11.2009

Test environment can be found at **tuubi.metropolia.fi**

Tasks

Subscribe to **workspace** called **Usability testing** in Tuubi. (User has the workspace on his/her General-workpsaces)

Go to workspace **Usability testing** and read the **description** about the usability testing from the **frontpage of workspace**. (User finds and can open the description)

Find and download file named **Usability_document.doc** from **Lectures-folder** and open it on the test computer. (user is reading the content of the file on the computer)

Open **assignment "Usability testing 1"** and do as you have been told in the assigment (in the assignment test person will be asked to upload a file from the desktop as submitting an assignment) (user has given his/her answer by submitting a file)

Open **assignment "Usability testing 2"** and do as you have been told in the assigment (in the assignment test person will be asked to give feedback about the assignment as a text) (user has given his/her answer by submitting text)

Read **feedback** for the **assigment 1** (user sees the grade and comment on his/her assignment)

Look up the **date** for the **final assignment** from **calendar** (can see the final assignment on the calendar)

Show how to see the people who are **described** to the same **workspace** (can see other members of this worspace)

Reply to a message on the **discussion board**. (There is a reply from user to Test-message)

(Subscribe to Random-workspace in Tuubi. (User has the workspace on his/her General-workpsaces)This is to test the retention.)
