

Lecturers grade students in their group based on quiz points, participation in the class, group works, assignments and final day presentations. The weights of the different parts depend on teachers' approach, so each teacher adapts own assessment rules.

The grades are based on following percentage values of the maximum:

90%-100% = 5

80%-89% = 4

70%-79% = 3

60%-69% = 2

50%-59% = 1

under 50 % =failed

We assume that the students will attend all teaching and classes during the week and the attendance is followed.

If a student misses one of the classes, he or she should be downgraded based on following scale:

1 day -20% ; more than that - failed.
