

Anikó Osváth
University of Pécs, Hungary

Profile: Professor Assistant, Clinical Psychologist

Title: Mental and Psychosocial Health in Hungary

Short description: Efforts in Hungary to develop mental health programs:

- the characteristics of the new National Mental Health Development Program
- the major mental problems in Hungary (depression, alcohol/drug abuse, suicide behavior, sociocultural disadvantages)
- age-related specialties (childhood, adolescence, elderly)
- community development to prevent the mental problems
