Ala architects have designed the winning entry for the central library, named Käännös (Turn). It will be built in 2017. The surrounding area will remain much the same and will have room for the bicycle center.

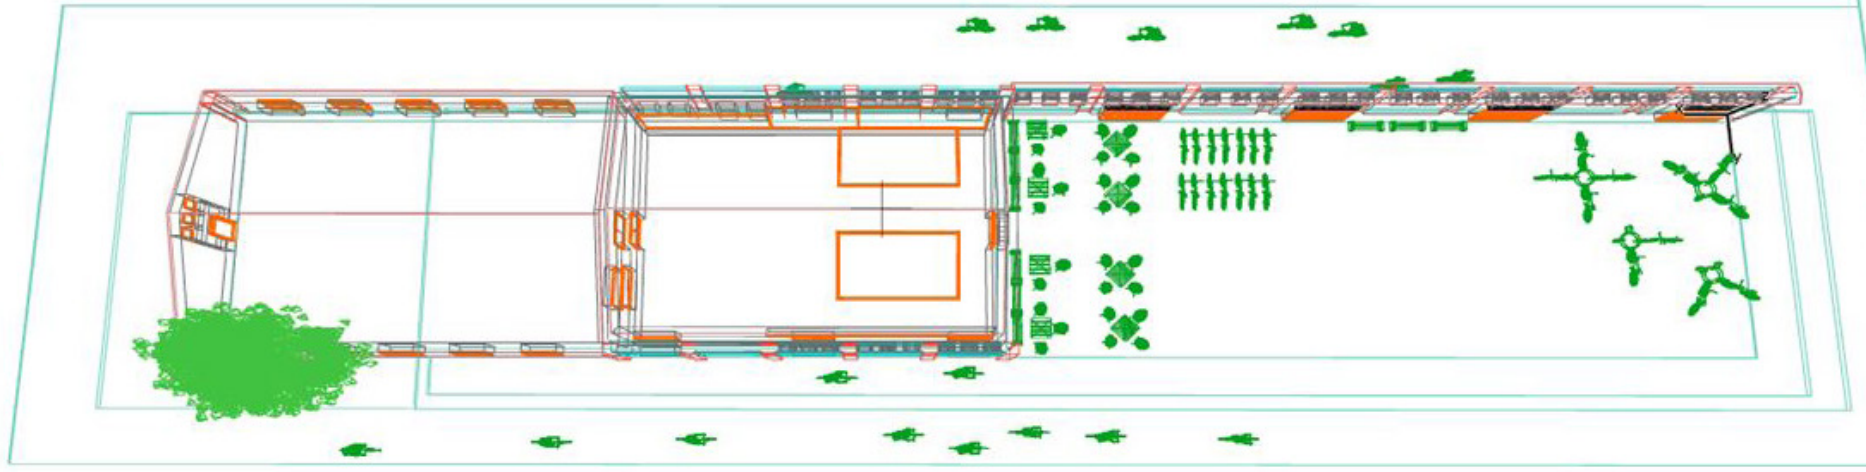

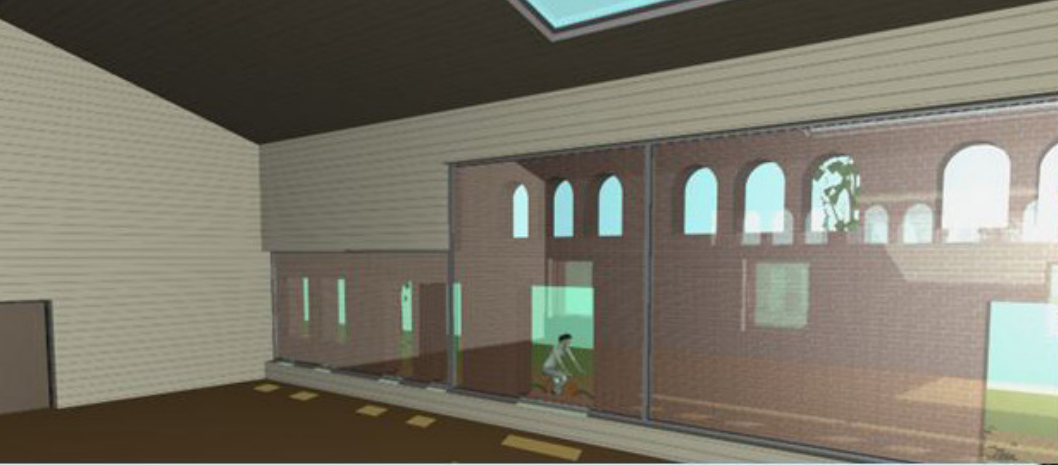

We have two options for the new Bicycle center. Either a final building or a temporary center.

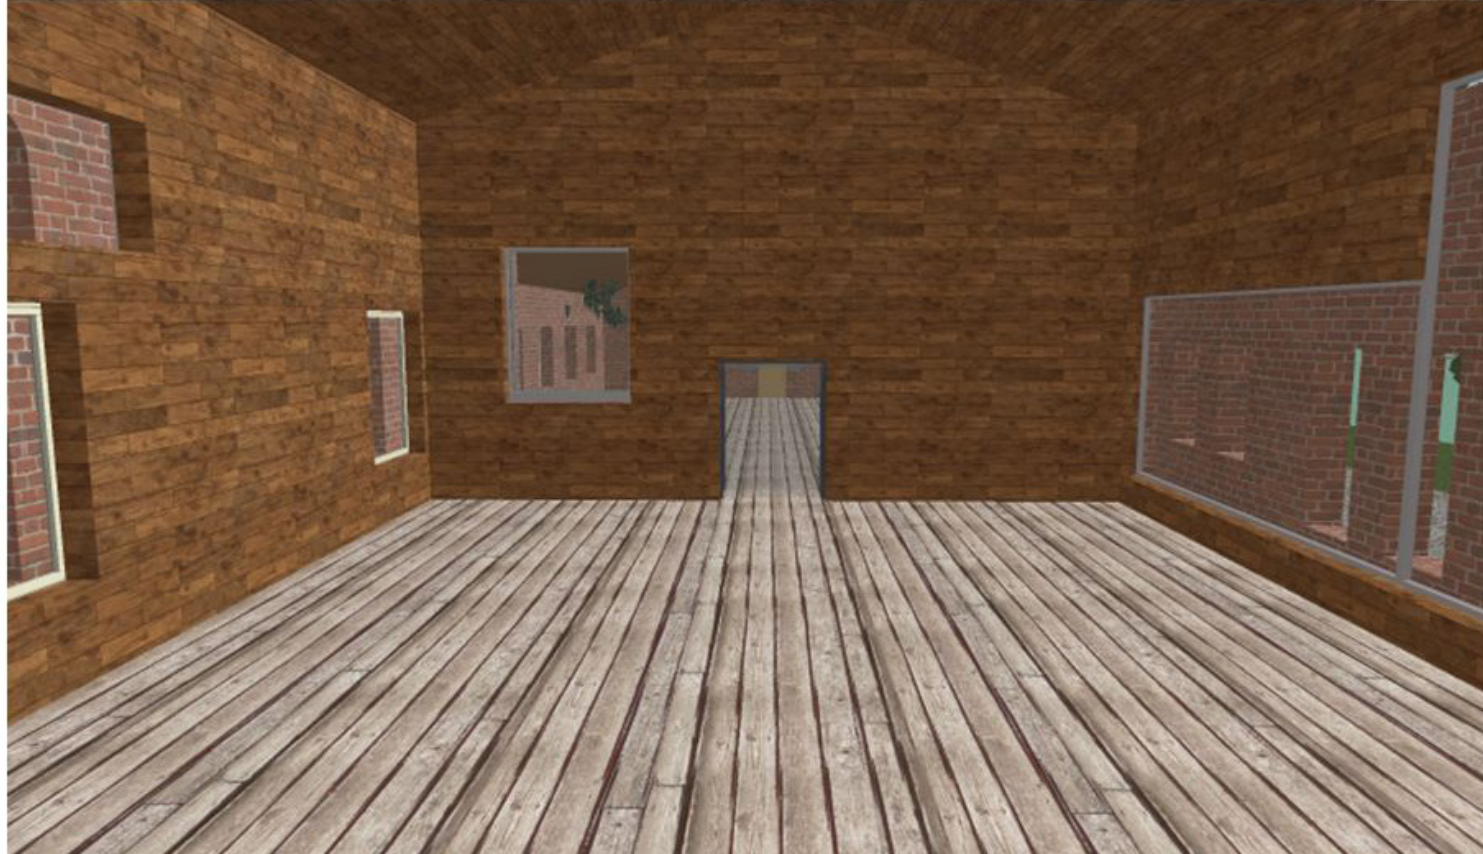

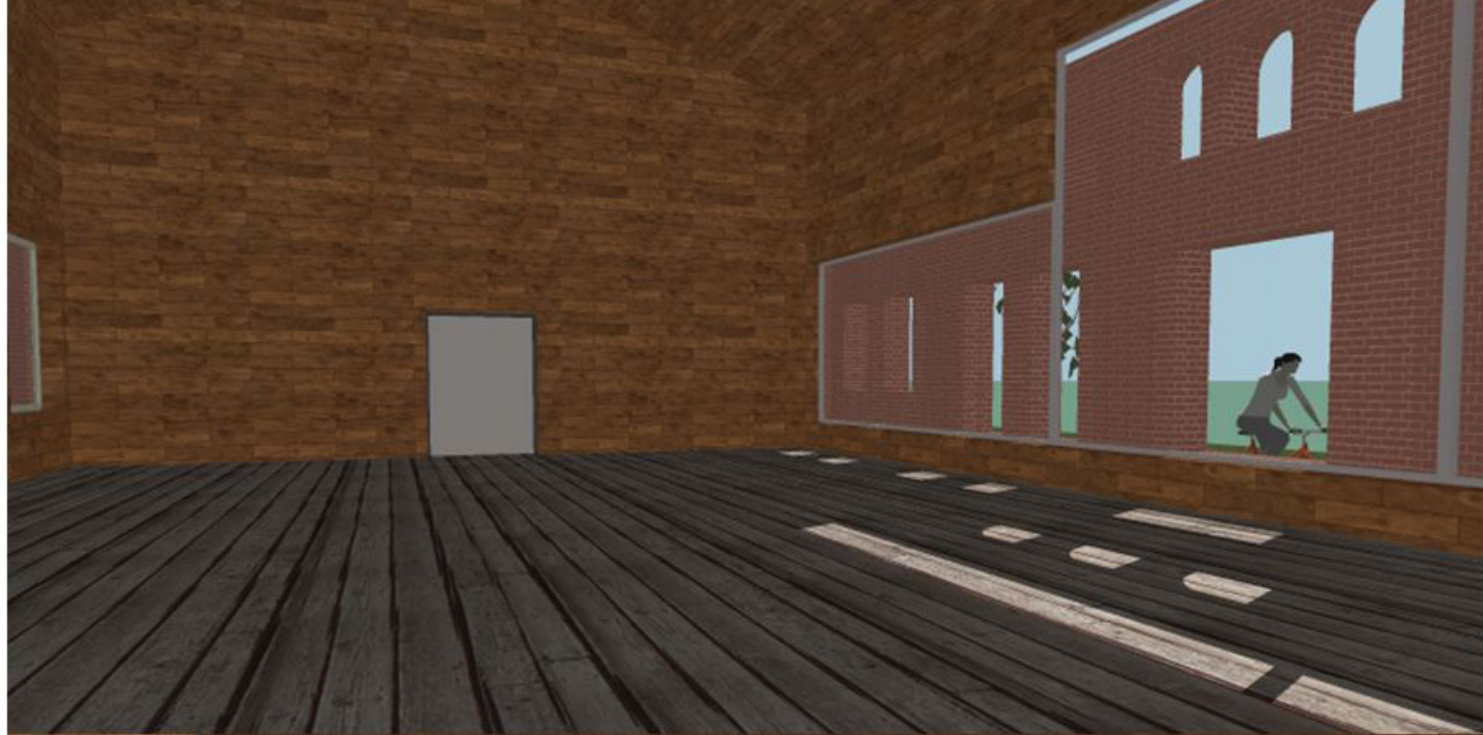

1

There could be another smaller wooden or glass house inside the old building which does not have a roof anymore. We would like to use organic materials so that the new building would blend in to the old one.

2.
