

Informationboard

LAD | Liikkuvan Arjen Design

Karppanen

Keinänen

Vuokila

Topic

Our topic is “Bicycle roads and lanes”.

We develop guiding service to all cyclists in Helsinki and Vantaa regions.

Concept Idea

Informationboard is an electronic map with touchscreen.

It shows preprogrammed routes in Helsinki and Vantaa regions.

Cyclists will get more useful information to help route planning:
You can choose different route options, based on your interest as a cyclist.

Our concept is partially based on the SYKLERI concept developed in LAD -project in 2011 and 2012. SYKLERI is an informative drive-by gate concept, that measures i.e. speed, time and temperature.

We want to take the concept further and more informative by adding routeplanner.

Potential Timetable

Week 35: Design drivers, collecting information, presentation

Week 36: Collecting information, concept developing

Week 37: Concept developing

Week 38: User scenarios

Week 39: CAD modeling

Week 40: Prototype and visualization

Week 41: Visualization, presentation
